CALL FOR PAPERS

The 12th IFIP International Conference on Network and Parallel Computing – NPC 2015

<http://npc15.cs.umass.edu>

★ ★ ★
1-Week Extension

New York, New York

September 17-19, 2015

Papers Due: March 16**Posters Due: June 1**

NPC'2015 provides a forum for bold and innovative ideas. Big Data, Internet of Things, Smartphones, Youtube, Globally Distributed Databases, Social Networks and more are driving network and parallel computing in new directions. Security and privacy have new importance after break-ins at major retailers and banks, Stuxnet, and the revelations of Edward Snowden. What are the implications for network and parallel computing?

NPC especially seeks early stage work with the potential for major changes in network and parallel computing. Although quantitative assessment is valuable, and NPC welcomes such papers, NPC places yet more value on bold ideas, even if all of the details and corner cases are not yet resolved, or the ideas fully implemented.

NPC 2015 welcomes original submissions in a range of areas, including but not limited to:

- In-Memory computing
- Applications of parallel and distributed computing.
- Systems, networks, and architectures for high end computing.
- Parallel and multi-core issues and opportunities.
- Big data intelligence.
- Virtualization of machines, networks, and storage.
- Programming languages and environments.
- I/O, file systems, and data management.
- Resource management, scheduling, and load-balancing.
- Performance modeling, simulation, and prediction.
- Fault tolerance, reliability and availability.

NPC is in its 12th year and previous conferences have attracted high quality papers and wide international participation.

As in previous years, we will publish top papers from NPC 2015 in a special issue of the International Journal of Parallel Programming, and proceedings will be published as part of Springer LNCS. Additional details are on the NPC'2015 website above.
